Sowing Seeds today for Successful tomorrow...

Global Public School, Kota (GPS) was started in 2002 by leading educational group Career Point, with an objective to provide World Class Education to the students of Kota. Under the aegis of leading educational group the school is sowing seeds of Knowledge, Skills and Values in Children for their successful tomorrow. Within a span of 13 years GPS has carved its own niche and has been credited among selected top most reputed schools of the city.

Career Point firmly believes in "Student First" approach and takes all necessary actions to provide best education, infrastructure and facilities to the student fraternity.

Career Point believes in encouraging the natural curiosity of young minds to ensure perfect learning. At GPS, the team is committed to provide best education to confirm fundamentally strong and logically sound budding youth.

This magazine 'Globazine' is a small gratitude to our students as a platform to showcase their talent and appreciate their efforts in a better way.

Editor's Note...

We sincerely welcome you with the motto of excellence through a positive attitude. The school has a task of creating a role model environment with motivated teacher encouraging students to excel in their future.

It's not only that there are few winners and many losers these days. Its more an understanding that this isn't who we want to be and that this isn't the world into which we want to send our children. Keeping this motto in our heart and soul we render the best opportunity to the students for an all round development. Our emphasis is not only academics or text book oriented teaching but also culture, sporting activities and many other creative activities to allow children achieve comprehensive personal growth holistically.

We wish the reader of this 4th volume of Globazine a happy reading and invite them offer any suggestion for improvement.

Mrs. Jonaki Datta

Mrs. Aditi Ketkar

Message From the Principal

We are a school with a difference! We value individualism, creativity and innovation and strive to nurture them in our students.

All great ideas begin with a commitment to the future. Aim of holistic education is to inculcate this vision into a student. The kind of education we impart to a child at GPS lays the foundation of life and shapes its destiny. That explains all our concerns and anxieties of education. There are challenges ahead of us, however, as I truly believe, "Together we can make a difference." Keeping this in mind, the GPS family continues to remain committed to achieve both, our vision and mission.

At GPS, we strive to create a dynamic environment for education and set the stage for student's achievement and success. Each day, children of varying abilities, talents, interests, and backgrounds work and play together. We encourage our students to challenge themselves, celebrating their creativity, initiative and individuality, through their daily interactions in the classroom, as well as, their participation in our many co-curricular programmes.

I am privileged and consider myself fortunate that so many wonderful students, staff members, and families touch my life each day. The school's partnership with our parents is vital to the success of our students and school. It is our commitment to our students that we SHALL extend the best innovative practices in every sphere of their schooling. No stone will be left unturned to ensure our children reach the next milestone with great confidence, self-esteem, elan and poise.

With this, I wish everyone a significant and remarkable future and new year ahead!

Mrs. Sumati Paliwal

The Team

Children learn in collaboration with others yet have to develop learning for themselves. True collaborative exploration takes place where all participants influence the direction, timing, and outcome of the investigation.

Coordinator:
Mrs. Savita Soni

Parents tend to think that children are naturally loving and generous with their affection. This is true, but for loving sentiments to last, they need to be reciprocated. "I love you" is probably the one that a child is least likely to hear.

Pre-Primary Coordinator:
Mrs. Namrata Vijay

An examination is a special test to see how good somebody is at something. Thus believe in your hard work and the efforts you have put in. Success will be yours at the end.

Examination Coordinator:
Mrs. Vijaya Khandelwal

Do you wish you could apply creative thinking at work to try new things? Do you doubt your own capacity for creativity and innovation? Do you have trouble getting creative thinking and solutions from your team?

Discover new ways to break through mental barriers and raise your, yes "Yours", foot towards the path of innovation and creativity.

Activity Coordinator :
Mrs. Jonaki Datta

Mentorial...

Head Boy :
Lakshya Gupta

"Rejoice in the way things are. When you realize there is nothing lacking, the whole world belongs to you."

Education isn't learning. Being a globalite besides education, we grasped millions of lessons and experiences, that taught us the way of living.

Our message to our beloved juniors is, find happiness in even smallest of things. Capture the good and delete the bad. The school life is the golden age, which remains inscribed forever in our minds. Try to fill up that golden page with the unforgettable memories. Be who you are.

One day, your whole life will flash in front of you, make sure it's worth watching.

Head Girl :
Simran Ahuja

Do you marvel at people who use language in unusual ways?

Today I will open up my heart and soul for the love of the language: **ENGLISH**. When students are told to speak in English, few waffle, few hesitate and then finally speak. I am exasperated when you avoid the instinct of your heart to speak English. Why every time you are brought to mind that you (this present generation) who belong to the competitive lane have to strive in the forthcoming years of your turmoil to excel in your life due to rat race and cut throat competition?

I would like to share some tips to overcome your reluctance towards English.

I love when someone turns a phrase, that makes me stop and reconsider conventions or expectations. Why can't you? I feel you should break the rules and discover a new truth. Never be skeptical about yourself. Sometimes you speak a poetry unknowingly. Breaking the rules does not mean we should eschew the rules. Generally we hate typos and misspellings when they happen in our writing. We strive for grammatical and syntactical perfection. Am I right?

For this types of errors you can make a move from a black and white

view of language into the land of gray tones. I guarantee you that sometime you will not make mistakes but you will be pushing yourself for something original. You just have to push for that independence of thought, the idea that gets skewed and allows for discovery, the research that lead to realization, the designs that shaped new expressions or anecdotes and silently this will encourage your inner commitment and your memories will become defining stories.

I would also like to make the case for speaking as a practice where mistakes can lead to glory. Artist too take time to reach the height of perfection after innumerable failures, so why can't we.

So let us strive for excellence and understand that a misstep can sometimes lead to a more beautiful appreciation.

Enjoy the language and be kind to yourself and others, when it comes to making mistakes. They could lead to the most compelling and meticulous work you do.

Mrs Jonaki Datta (HOD- English)

The Barefoot Challenge

We live in nature, but we don't live naturally. We live on the earth, but we don't touch it. Ninety percent of the time, we hide from the sun. We use hot water to bath, which is a fast, functional affair. Most of the time we condition the air we breathe. In winter, we keep warm and in summers we protect ourselves from the heat. We burn most of the vitamins in food we eat. We protect ourselves from all that is natural. And many of us fall ill from time to time and worry about our general health. What can we do to heal ourselves? The simple and the quick way is to get back in touch of earth. Walk bare foot.

Soil has healing properties; it draws out toxins from our body. Walking barefoot on mother earth is like hugging your mother. Nature has made our feet sensitive. We have many acupressure points on our feet, which loves to be massaged. But we deprive our feet of different surfaces by covering them with thick chappals, or walking on flat tiled floor. Try this experiment. Twice in a day

walk barefoot on bare earth for fifteen minutes. It might be painful at first, but soon your feet will relish the massage. Most of your body aches and pain will diminish within a week. If you continue for more than a month, you will start feeling a new strength in your body.

Walking barefoot is especially good for knee pain, stiffness of joints and back pain. Even digestion improves drastically by the acupressure effect of barefoot walking. Add to this a warm footpath at night for five minutes will refresh your entire being and seal in the energy.

Nature cure is an inexpensive and straightforward system of alternative heading. All it requires is the small courage to take the small out of our comfort and fashion zones.

(HOD- Social Science)

Computer and technological convergence

Computer has changed the way we create, consume, learn and interact with each other. Time has proved that the information technology is a very important concept in the academic development. A person is considered to be literate only when he has operative computer knowledge.

Computer learning has become an essential need for everyone. It is no more an option. Technological convergence has grouped various technologies that have been developed for one use and now they are utilized in many different contexts. New technologies are increasingly converging into one. Technology has resulted in devices that not only interact with the media but also can be used in other ways. It has replaced the use of number of devices by a single device. It has saved the cost and time both, one of the super example is **Internet**.

Ms. Monika Bharadwaj
(HOD Computer Science)

Theories of Mathematics

Mathematics may be defined as "the study of relationships among quantities, magnitudes and properties, and also of the logical operations by which unknown quantities, magnitudes, and properties may be deduced.

Historically, it was regarded as the science of quantity, whether of magnitudes (as in geometry) or of numbers (as in arithmetic) or of the generalization of these two fields (as in algebra). Some have seen it in terms as simple as a search for patterns.

During the 19th Century, however, mathematics broadened to encompass mathematical or symbolic logic, and thus came to be regarded increasingly as the science of relations or of drawing necessary conclusions (although some see even this as too restrictive).

The discipline of mathematics now covers - in addition to the more or less standard fields of number theory, algebra, geometry, analysis (calculus), mathematical logic and set theory, and more applied mathematics such as probability theory and statistics - a bewildering array of specialized areas and fields of study, including group theory, order theory, knot theory, sheaf theory, topology, differential geometry, fractal geometry, graph theory, functional analysis, complex analysis, singularity theory, catastrophe theory, chaos theory, measure theory, model theory, category theory, control theory, game theory, complexity theory and many more.

Mr. Vishal Adwani (HOD -Mathematics)

What is SCIENCE : "Certainty or Presumption"

Science is the intellectual and practical activity encompassing the systematic study of the structure and behavior of the physical and natural world through observation and experiment. Science provides us with a logical, factual and generally rational explanation of the World around us. Science is not about proving the non-existence of God. It is about providing a solid basis on factual, repeatable, measurable and determinable results.

Science is everywhere in today's world. It is part of our daily lives, from cooking and gardening, to recycling and comprehending the daily weather report, to reading a map and using a computer.

Certainty and science

A scientific theory is empirical, and is always open to falsification if new evidence is presented. That is, no theory is ever considered strictly certain as science accepts the concept of fallibilism. The philosopher of science Karl Popper sharply distinguishes truth from certainty. He writes that scientific knowledge "**consists in the search for truth**", but it "**is not the search for certainty**". All human knowledge is fallible and therefore uncertain."

New scientific knowledge rarely results in vast changes in our understanding. It may be the media's overuse of words like "breakthrough" that leads the public to imagine that science is constantly proving everything it thought was true to be false. While there are such famous cases as the theory of relativity that required a complete reconceptualization, these are extreme exceptions. Knowledge in science is gained by a gradual synthesis of information from different experiments, by various researchers, across different branches of science; it is more like a climb than a leap.

Theories vary in the extent to which they have been tested and verified, as well as their acceptance in the scientific community. For example, heliocentric theory, the theory of evolution, relativity theory, and germ theory still bear the name "theory" even though, in practice, they are considered factual. Although the best definition for "knowledge" is contested, being skeptical and entertaining the possibility that one is incorrect is compatible with being correct. Ironically then, the scientist adhering to proper scientific approaches will doubt themselves even once they possess the truth. The fallibilist argued that inquiry is the struggle to resolve actual doubt and that merely quarrelsome, verbal, or hyperbolic doubt is fruitless but also that the inquirer should try to attain genuine doubt rather than resting uncritically on common sense. He held that the successful sciences trust, not to any single chain of inference (no stronger than its weakest link), but to the cable of multiple and various arguments intimately connected.

Science avoids searching for a "**magic bullet**"; it avoids the single-cause fallacy. This means a scientist would not ask merely "**What is the cause of ...**", but rather "**What are the most significant causes of ...**".

The Benefits of Yoga

Yoga, which derives its name from the word, "yoke"—to bring together—does just that, bringing together the mind, body and spirit. But whether you use yoga for spiritual transformation or for stress management and physical well-being, the benefits are numerous.

Yoga is the oldest defined practice of self development. The methods of classical yoga include ethical disciplines, physical postures, breathing control and meditation. Traditionally an Eastern practice, it's now becoming popular in the West.

Techniques found to reduce stress derived from yoga:

- Yoga Positions
- Managing Stress
- Breathing Exercise
- Breathing Relaxation
- Controlled breathing and many innumerable techniques.

Yoga's Effects On the Body

- Reduced stress
- Sound sleep
- Reduced cortisol levels
- Allergy and asthma symptom relief
- Lower blood pressure
- Lower heart rate
- Spiritual growth
- Reduced anxiety and muscle tension
- Increased strength and flexibility

What's Involved With Yoga?:

The practice of yoga involves stretching the body and forming different poses, while keeping breathing slow and controlled. The body becomes relaxed and energized at the same time. There are various styles of yoga, some moving through the poses more quickly, almost like an aerobic workout, and other styles relaxing deeply into each pose.

What Are the Drawbacks of Yoga?:

Yoga does require some commitment of time and is more difficult for people with certain physical limitations. Some people feel self-conscious doing some of the poses. Also, yoga classes can be expensive, although it is possible, albeit perhaps more challenging, to learn from a book or video. Hence you should always follow the instructions of your instructor.

Sky Is The Limit...

Climb high, climb far,
Goal the sky and aim the star
Set your destiny and then move further
This is for sure you'll face many obstacles and many hurdles.
But be optimistic and be practical.
And you will reach the destination, may it be critical.
Arise awake and stop not,
Till you reach the goal, see what you want to hold.
Give some time to yourself,
And then see how many hands are there to congrats.
You will face many ups and downs
Still move further, not inside the ground
Because one day you will definitely wear the crown
And place your parent's head in the sky from the ground.
Keep your interest alive in whatever you do
Have patience and change your mood
The time is here, this time is yours
Utilize its best, to get what you want more.
Life is full of mystery,
But never give up by listening other's history.
Climb high, climb far,
Goal the sky and aim the star.....

A sweet little voice of an Angel

Let me live
Let me bloom
Let me shine
Like a beautiful moon.
Let me come and
See this world
Let me fly like
A beautiful bird.
Don't be so cruel
Or selfish
Let me swim like
A colorful fish.
Listen to my scream
Let me fulfill
My wishes and dream.
Let me see this
Beautiful earth
Please don't kill me

Being Great

No one on the Earth could outlive the lusty time but there are, who have the ability they become inevitable for time to be obliterated. I, in life conquest, hadn't stretched mine arm so far but for what I live, I could comprehend the meaning of being Great.
Great can't be one from his own inner self but great becomes by the world's honor. A great had to bear tides of time and those who prepare the soul then they always deserve opinions of success. For being great ,doesn't mean success lies on his hand but to be great, custom of fell deeds has to be its cause.
Do greatness for your heart
Feel greatness inner your heart and
Your greatness shall smell above the earth.

Once upon a time

When window was just a square hole in a room and application was something written on a paper when keyboard was a piano and mouse just an animal. When file was an important office material and hard drive just an uncomfortable road trip when cut was done with a knife and paste with glue. When web was spider's home and virus was flu. When apple and black berry were just fruits.

That's when we had a lot of time for OUR FRIENDS!

My Best Friend

One who cares for me
One who shares with me
All my joys and sorrows
All my today's and tomorrow's.
One who knows my tears
One who joins my cheers.
My achievements makes her glad
My failures makes her sad.
One who shares her only umbrella with me
One who never left me alone in the rain
Whose love for me knows no end
I call her Yatika
Oh! My dear friend.
True friends are like diamonds
Precious and rare
False friends are like pebbles
Found everywhere.

My school Bag

My school bag is like a suitcase
So heavy and so big
And me like a coolie.
My school bag is like a first aid box
So many medicines are there for my future
And me like a doctor.
My school bag is like an instrument
Which makes my future bright
And me like a good student. . . .

I'm your little flower , Dad

I'm your little flower, Dad
Please help me grow and bloom.
Take the weeds but leave the roots
And give me lots of room.
Dad , you are my gardener
My sunshine and my rain
Too much will make me wither
With enough , I'll bloom again.
I'm your little flower, Dad
I'm different from the rest
Don't pick me Dad, just help me grow
To be my very best.

What if I was dead today !!!

I was sitting in my house
Seeing a cockroach killed by a mouse.
I got a sudden thought to lay
What if I was dead today !!!

It led me very serious
About my life I was curious
Because I got a thought to lay
What if I was dead today !!!

Then I got very scared
Because, by everyone I was cared
I had a thought to lay
What if I was dead today!!!

I thought of completing all my task
And I heard a dog's bark
Got out of the thought of being slayed
Because I thought what if I was dead today !!!

A New Recipe-Try It !!!

Take 1 kg of love
On it sprinkle exactly 200 gms of smile.

When the mixture is ready
Add four teaspoon of trust and
800 gms of sympathy.
To give a flavor of spices to it,
Empty a bottle of confidence and
Forgiveness into it.

Let the mixture ferment and thicken
Add an equal amount of weight of
Happiness to the above quantity
Keep this mixture in the deep freeze
Of sacrifice for sometime

After an hour cut it into equal piece for garnishing
Transfer the dish to a bowl
Strong enough to uphold all your virtues
And brittle enough to be broken by the weight of all
Distribute it among friends and foes. . .

This is a delicious recipe named "LIFE"
Enjoy it before it is devoured by the BIG MONSTER-" TIME"

Maneet Jain (X-C)

The diary of a Teenager

It started with a rain shower
A minute after I was near the fire.
"It" is nothing but a deep memory
Like a Heaven Angel's love story.

It started with a plain.
After some time I was on the land.
My first trip of hell
It was truly very well.

It started with a lonely street
By the corner where we meet.
He wasn't any ordinary kid
But a buddy whom I always wanted to be with.

It started with a manifestation
Never know it will ever show me my destination
Don't follow other's step
But make your own lane.

You might be thinking I am repeating "It" – "It"
But you have to wait a little bit

"It" is nothing but a fact
But "It" lays a deep impact.
"It" is the beautiful experience I ever had
A team first in life I led.
Now I will tell what is "It"???
"It" are the incidents which makes your light lit.

Life and Cricket

Anger is a wide ball, Leave it;
Fear is a No ball, Let it go;
Smile is a Sixer, Hit it;
Friendship is a wicket, Get it;
Failure is a Bouncer, Forget it;
Problem is a Yorker, Face it;
Success is a Century, Make it;
Luck is a Free hit, Use it;
Then you can rock the world cup of Life!!!

The Magic of Rain

As I walked in a grassy lawn,
The drops of water came down,
The sound was very enchanting,
I thought it was my heart's sound.
The peacock danced in the rain,
So beautiful were its feathers,
All creatures forgot their pain,
And enjoyed the beautiful weather,
It gave me a nice feel,
I thought the nature was shedding tears,
I felt all my wound will heal,
That I got from my dear.
As nature became light,
I wished I could do so,
But I needed to fight ,
Let the world see my sorrow.

On the Horizons: The School Tour

You never realize the value of a moment, until it becomes a memory. The 5 day mesmerising tour from 28th Sept 2014 to 3rd Oct, 2014 organized by our school, had its traces inscribed deep in our hearts. It was a bus journey, a visit to wonderful cities of Jodhpur and Jaisalmer and the soothing part of Thar Desert. The visit to the Mehrangarh Fort and Umaid Bhawan Palace in Jodhpur, remind us of our history lessons. The antique mantle pieces, weapons , the beautiful clothes of Rajas, their rooms, their chariots, sculptures took us centuries back in the past in the city of Havelis . We had a musical party and enjoyed to our fullest. The next morning we visited few of the havelis of The Jaisalmer Fort. The scene inside made us relive in past. We felt ourselves captured by the time, just getting lost in the pale brown bricked walls . Then we saw one of the most wonderful scenes, the sunset at Sam Desert. The faded yellowish orange coloured sky with a tinge of blue appearing to be mixed with the sandy cover of land, was the

way of nature to embrace the humans there. The camel ride and cultural programme couldn't be forgotten. Away from the bollywood mixes, it was all folk, cultural and so ethnic.

But beholding the mesmerizing panorama of the twinkling dark night sky above and the chilly same cover below, was the heart of whole trip. The whole sand scape lightened , just with those glowing particles when the artificial light went off.

Sleeping in the tent like small fabric huts was a lifetime experience. The last night was of Gadisar Lake where we observed a new kind of fish never seen before. And then we departed for Kota, taking along just the collected memories, those awesome clicks of cameras our fusion with nature and loads of happiness.

The tour filled by a GOLDEN page in the book of our school days, making us elated and our lives more richer and more complete.

Life: You Never Get it twice

Always thank God
For giving you this life,
And make full use of it
Because you never get it twice.

Leave your sorrows behind
And cheer up to welcome your life,
Do what you want to do with it
Because you never get it twice.

When you know, death is near you
Try to take it as a gratitude
And say to yourselves that your life is awesome,
Because you never get it twice.

Master Blaster

A boy little and chubby
With hairs silky and curly,
Made his country feel pride
For this he chose cricket side!!!

Yes! It is our little master
None other than 'Master Blaster',
Made cricket an addiction
For him dreams had no restrictions!!!

Till the bowlers were tired
He played shots, truly inspired,
Thanks for all those memories
You deserve a lot of glories!!!

Pointing, Kallis all together
Can't match you forever,
Bowlers fear you a lot
When you just play a shot!!!

One who will rule hearts forever
Is none other than 'Master Blaster',
No one can match you forever
You are the finest cricketer seen ever!!!

My heart melts

The sky is blue
And cloudy too,
I'm blessed to have a friend like you
You are a special gift for me
A gift I couldn't see
Now I recognize you
Yes I do, yes I do.
My heart melts into pieces
Two by two
I think I can really trust you
Or would you break my faith,
Through and through
I'll never regret
That you're my friend
I really want to trust you till the end
Please be true,
In whatever you do
Don't make me
Really hate you
Please be fair on your good part
Please don't make me fall apart.

Oh ! Chemistry

Oh! Chemistry
You yourself is a mystery,
Your chemical equation
Creates irritation.
Your formulas are not so bad,
But they make the reader totally mad.
When I read about elements and compound,
My mind echoes with sound.
When comes metal and its ore,
I feel I'm in the earth's deepest core.
Potassium, sulphate or sodium nitrate,
It makes my hair stand straight.
When comes chemical's taste sweet or sour,
I want to hide behind the Eiffel tower.
When I learn chemical reactions,
My mind takes inverse actions.
Methane, ethane, butane, propane
These terms make me scared again.
Sulphate , sulphite ,nitrite,
Reading these is worse than swallowing cyanide.
Oh! Chemistry you are a unique creation,
Indeed you are beyond my toleration.

"Fact of Life"

Once there was a handsome boy with blue eyes. He used to go to the forest daily and sat near the lake and used to see his reflection in the water. He saw his own reflection in his blue eyes for hours daily. One day suddenly while sitting near the lake, the boy fell down and died. The lake started crying and daily at the same time the lake cried. One day the God of heaven appeared and asked the lake "Why are you crying?" "Was the boy very loving and handsome?" "Why are you feeling bad for him". The lake replied I never noticed about boy's beauty but I am crying because, I noticed my own beauty in his eyes daily for hours and I felt so happy, content and satisfied.

Man vs Money

The word rupee comes from the Sanskrit 'Rupya' or 'Rupa' which means silver. The very early coins, before the second century B.C were all made of silver but the coins were neither of any standard weight nor had any face value printed on them. It was Sher Shah Suri who first gave the name Rupia to the silver coins. The last silver coins were minted in 1940 with the face of King George VI on them. In 1942, the silver coin was replaced by a cupro-nickel coin for the first time. Money was invented by man to get power but now money has become more powerful than man. All over the world, money and power go together. The more money a person has, the more successful he is judged to be. A rich man is accepted by society even if he is corrupt or evil. Man works hard to earn more and more money and saves a lot of it. He thinks that money will give him more freedom to enjoy himself and to have lots of fun. He thinks he will not be anyone's slave but be his own master and unknowingly he is a "SLAVE".

Mrs. Manisha Arora (Faculty)

Imagination creates Reality

Your own wonderful imagination in the actual creative power of God is within you. It's your savior. If you are thirsty, water would be your savior. If you needed a job, employment would be your savior. Your imagination is the power to save you from whatever circumstances you now find yourself. You can experience your heart's desire through the use of your imagination. Nothing is impossible to your imagination. Your imagination is unlimited, in what it can be accomplished. If you can imagine something, you can achieve it. Dream better than the best you know.

Our inner conversation are just as creative as our deliberate imagining of the wish fulfilled. In fact, if they are of the opposite nature, they can negate what we have imagined. You must watch what you are saying internally to make sure that these conversations coincide with your wish fulfilled. If you become aware that these inner talks contradict what you would like to achieve, revise them so that you desire or are already the person you wish to be. Your present world reflects the sum total of all that you believe to be true of yourself and others. That which you imagine yourself to be today, goes forward and will comfort you in the future. If you have forgotten your activities of the past, that which you see appearing in your world indicated the kind of seeds you have previously sown.

Assuming the feeling of your wish fulfilled is using your imagination creatively to bring into your world that which you desire to experience you can use the art of revision of change, the effects of prior thoughts and beliefs.

Ms. Shreya Gaur (Faculty)

Are we Willing?

To forget:

What we have done for other people and to remember what other people had done for us.

To ignore:

What the world owns you and things what we owe the world.

To put:

Our right in the background, duties in the middle and our chance to do little more than our duties in the foreground.

To see:

That our fellow men are just as real as we are and try to look behind their faces into their hearts hungry for joy.

To close:

Our books of complaints against the management of the universe and to look around for a place where we can sow few seeds of happiness.

**ARE WE WILLING,
TO DO THESE THINGS EVEN FOR A DAY?**

Ms.Neha Jain (Faculty)

Ramblings of a rumbling mind

On the wings of a butterfly on a crisp cottony morn
On the shell of a snail of lazy daisy noon
On the twigs of lilies, an evening asking for a boon
On a lone flea aback a shiny leaf, on a starry night, a wish newly born.

I have envisioned a ship made of water,
Dreamt of a sky liner surfing through clouds,
Fancied a submarine piercing the heart of ocean,
All sailing towards a destination unknown,

I have been asked but I said later!
What's the rush? What's the frenzy? Says a firefly in my ear
They are going there? Where? Said I
Have you not got the calling yet? Nope!

Not quite; say I am not the chosen one, I look up to the sky.
I have not got the Eureka moment yet
But yeah sure am looking for mine
Waiting for the violent tumult to ebb inside when the emptiness evades you
And Just 'BEING' rejuvenates you

परवरिश

माता-पिता अपनी संतान का लालन-पालन करते हैं, उसकी परवाह करते हैं और उसे निरन्तर आगे बढ़ने के लिए प्रेरित करते हैं इसे ही परवरिश कहते हैं।

संतान बड़ी होकर सुयोग्य बने तो माता-पिता की परवरिश सफल हुई। चारों ओर परवरिश सराहना पाती है। माता-पिता की तो खुशी का ठिकाना नहीं रहता। परन्तु इसके विपरीत संतान सुयोग्य व सफल न बन पाए और गलत रास्ता पकड़ ले, तो यह उसकी संगति का असर है। माता-पिता की परवरिश का नहीं ऐसा लोग कहते हैं।

वास्तविकता तो यह भी है कि माता-पिता भी अपनी परवरिश को गलत नहीं मानते हैं, वे तो मानते हैं कि उन्होंने जो किया सब बच्चे की भलाई के लिए था। दोष तो बच्चे का है तो गलत रास्ते पर चला गया।

ये हमारे समाज के कैसे दोहरे मापदण्ड है कि अगर अच्छाई उभरकर सामने आए तो हमारे कर्म और दोष उभरकर सामने आए तो स्वयं का गुनाह। कभी किसी ने इस पर गहरा मंथन नहीं किया कि पालन-पोषण में कहीं कमी रह गई। वह क्या था, जो बच्चों को मिलना चाहिए था पर नहीं मिला? क्या कारण रहा होगा जो बच्चे को बाहर का रास्ता चुनना पड़ा?

हमें आगे बढ़ते जाना है

आज की पीढ़ी में जीवन के प्रति उदासीनता आज एक प्रमुख समस्या है। हमारे युवा बहुत ही जल्दी अपना हौंसला खो देते हैं और संघर्ष करने से डरते हैं। हमें यह जीवन कुछ कर गुजरने के लिए मिला है और जीवन में संघर्ष करते हुए इस विचार के साथ आगे बढ़ना है।

नथ कनाहै, न रू कनाहै, न मुश्किलसे ष्ठ बरानाहै,
तूफानोंसे लड़ते-लड़ते, हमें पनाम गर्ब नानाहै,
चाहेर इहमें आए वर्तमान, हमें पार उ सेक रजानाहै।
मरजानाहै मिटजानाहै, बसअगोब दतेजानाहै।
जीवोंमें ए कजिवचिंटी, जोअबत कक भीन हरीहै
हरब रज तनकरते-करते, अखिरमंजिलको पतीहै
फिरक योंन हमं पीज तनकरें, नन्हीचिंटीसे शिक्षाल
उसकेजैसेहीलक्ष्यलिए, हमेंअगोब दतेजानाहै।

जीवनमुश्किलको असगरहै, हमरपलएकनईपरीक्षाहै,
लेकिनजोधुनकोपक्काहै, उंसनेहीजगकोजिताहै
कर्मठता, धीरज, अनुशासन, जीवनकेयेहथियारबने
कुछभीनहमारेसंमुखहो, बसविजयहमारालक्ष्यबने
बसयहीसोचकरहमको, यहीअगोबदतेजानाहै
बसअगोबदतेजानाहै, बसअगोबदतेजानाहै।

पुष्पा चौधरी (शिक्षिका)

पैसा एक हद तक खुशी दे सकता है? परन्तु वास्तविकता में आन्तरिक शान्ति तो वह कदापि नहीं दे सकता। उसके लिए तो रिश्तों की छोटी से छोटी बात को भी जीना होता है और यह सब सही व सन्तुलित परवरिश से ही सीखा जाता है।

बचपन से दुरव्यवहार देखते आ रहे बच्चे से बड़े होकर सद्व्यवहार की अपेक्षा करना व्यर्थ ही है।

श्री राम व श्रीकृष्ण जैसी सन्तान पाने के लिए क्रमशः दशरथ-कौशल्या व नन्द-यशोदा जैसे माता व पिता जैसी परवरिश भी तो देनी होगी। केवल दोष देने मात्र से पीढ़ी नहीं सुधरेगी। उसके लिए तो स्वयं के दोष को स्वीकार करते हुए उसे बदलने के प्रयास भी करने पड़ेंगे तभी सही मायने में परवरिश सफल होगी।

भारतीय संस्कृति व संस्कार व बच्चों में सत्विचारो को बचाए व बनाए रखने के लिए परवरिश में फेर तो करना ही पड़ेगा।

From the Patron...

To provide this quality education, a professional school advisory board, including a highly qualified team of teachers and a motivated support staff together, combined with excellent physical and academic facilities were put in place. This team works tirelessly to ensure the school achieves its mission and vision. The vision cannot be achieved without the support of the parents. Lastly, motivated pupils are the key in achieving the desired excellence.
